

## ABSTRACT OF THE DISCLOSURE

The present invention provides methods and apparatus for remotely managing and accessing print jobs stored in job retention of a printing device, including displaying, printing, canceling, prioritizing, and otherwise controlling various aspects of the print jobs and/or the print queue. In a preferred embodiment, the present invention makes use of a Java-enabled Web browser on a workstation, a java applet accessible by the Web browser, and an embedded Web server incorporated in a printing device to provide the management and access functions. Rasterized images of the print jobs may also be viewed by using the applet as a file viewer.
